SURVEY OF SOVIET ARTICLES ON COSMIC RAYS AND RELATED RESEARCH

50X1-HUM

The attached list is a compilation of English-language translations and original articles on cosmic ray research conducted by Soviet scientists believed to be affiliated with the Physics Institute in Yerevan.

Articles which appeared in the Soviet periodical "Journal of Physics" (JP) were originally published in English, a practice which has since been discontinued.

In addition to the articles given in the attached list, a survey of available scientific publications of the Academy of Sciences, Armenian SSR revealed the following additional information: Alikhanov, A. I. and Alikhanyan, A. I. "Measurements of Soft and Hard Components of Cosmic Rays by an Ionization Chamber."

Authors identified themselves with the Physico-Math. Inst. of the Academy of Sciences, Armenian SSR, Yerevan.

Measurements were carried out in the summer of 1943 at Alagez (3250 m) and at Yerevan (950 m).

Source: Doklady, Akad Nauk, Armyanskoy SSR, Vol. IV, No. 3, 1946, pp. 65-71.

[Note: The survey covered all copies of "Doklady" and "Izvestiya", Academy of Sciences Armenian SSR which were available at the Library of Congress. It should be pointed out that the more important articles appearing in Armenian scientific publications are usually republished in publications of the Academy of Sciences, USSR (Doklady, etc) 7.
